Product Data Sheet

Rustore 300 **Rust Primer and Remover**

Rustore 300 was developed as a basic solution to everyday corrosion problems. **Rustore 300** reacts with the rust (ferrous oxide) to form a hard, dark and impervious coating. This newly formed coating will serve as a paint primer by increasing the metals resistance to further corrosion. A more bondable surface for paint is provided which will reduce the frequency of repainting. When **Rustore 300** is used no part of the metal is lost because rust is chemically converted to a useful protective material. **Rustore 300** can also be used as a rust stripper by applying it to the rusted metal surface and rinsing it off using water.

Rustore 300 is also recommended for cleaning and brightening the oxidized surface of no-ferris metals.

Rustore 300 is also recommended for removing stains from porcelain, terrazzo, brick and other masonry surfaces.

Rustore Application

Rustore 300 can be applied by: brushing, dipping, mopping, rolling or spraying.

TYPICAL SPECIFICATIONS

Color	Brown
Appearance	Liquid
Brookfield Viscosity @ 77°F	600 - 1000

PLUSCO, Inc., P.O. Box 7953, Houston, Texas 77270
