

PLUSCO 408 BIODEGRADABLE HEAVY DUTY CABLE GUARD

Product Data Sheet

DESCRIPTION

PLUSCO 408 Biodegradable Heavy Duty Cable Guard was specifically designed to protect braided Wirelines in storage, or during periods of disuse. The "soft curing" green film protects against rust, corrosion, and deterioration for extended periods of six months or more. PLUSCO 408 Biodegradable Heavy Duty Cable Guard contains a special corrosion inhibitor package, including H₂S inhibitor as our Wireline greases in a higher concentration for improved protection. In addition to the corrosion protection package, PLUSCO 408 Biodegradable Heavy Duty Cable Guard also contains molybdenum disulfide to improve penetration into the line. This provides protection to the core, and also prevents penetration of contaminants during the running of the line.

APPLICATION

For best results it is recommended that PLUSCO 408 Biodegradable Heavy Duty Cable Guard be applied with a "pressure lubricator," however satisfactory results may also be obtained by spraying, brushing or wiping on the line while it is on the spool.

PACKAGE

5 GAL PAIL and 55 GAL. DRUM, and 200/350/500 GAL. BIN.

SPECIFICATIONS

Color Golden - Amber

Consistency Liquid

Odor Mild

Brookfield Viscosity @ 77°F 4000 to 5000 cPs
