## Product Data Sheet

### PLUSCO 301

### RUST - CHECK

### Environmentally Safe Rust Preventive

**RUST - CHECK 301** is a natural oil based rust preventive which functions as a water displacing fluid on metal surfaces. Upon application **RUST - CHECK 301** forms a clear, ultra thin, non-staining rust preventive film. After all water is displaced from the metal surface **RUST - CHECK 301** provides a protective residual film, which further protects the metal surface from rust and oxidation. This residual film is effective on the protection of ferrous and non-ferrous metal from atmospheric corrosion even under conditions of high humidity.

**RUST - CHECK 301** is recommended for newly machined surfaces, metal parts, fabricated components, bearings, shafts and internal surfaces of gearboxes and other areas where rust and corrosion are a frequent problem. **RUST - CHECK 301** is especially effective in protecting bright, ground, or highly polished steel surfaces. **RUST - CHECK 301** is especially recommended for application to finished machined surfaces on tools while in inventory or storage.

### TYPICAL SPECIFICATIONS

Physical Appearance	Clear Liquid
Color	Light Yellow
Odor	Mild
Viscosity #4 Ford Cup @ 77°F	15 - 17
Specific Gravity @ 77°F	0.88
Density Lbs. / gal. @ 77°F	7.4
Flash Point ASTM D-92	105°F
Corrosion and Oxidation Inhibited	Yes

PLUSCO, Inc., P.O. Box 7953, Houston, Texas 77270

Warranty: Because the conditions of use and the supervision of application are beyond the control of Plusco, Inc., we assume no liability for any product failure or other damage beyond the purchase price of the material furnished by us. No agent or representative or employee of this company is authorized to change this provision which relates to all goods delivered whether sold or delivered as samples or otherwise.
