## Product Data Sheet

### **PLUSCO 422 4xI Wireline Grease Seal**

**PLUSCO 422 4xI Wireline Grease Seal** is a viscous, pumpable product specifically formulated for use in standard Wireline grease injection units and cable lubrications. Plusco Wireline Grease Seal is commonly referred to as “**Honey Oil**”. The product contains a specially balanced combination of corrosion inhibitors, H<sub>2</sub>S inhibitors, anti-oxidants and anti-wear additives for reducing friction and keeping Wireline wear down to a minimum thus providing maximum protection to the line, even under the most severe operating conditions.

**PLUSCO 422 4xI Wireline Grease Seal** adheres to the line thereby reducing splatter or drip around the equipment being used or on the rig floor. **PLUSCO 422 4xI Wireline Grease Seal** prevents loss of well condensate and gases during wireline operations. Because the product has highly adhesive qualities, a protective film forms on the line further enhancing the performance of the anti-corrosion package.

**PLUSCO 422 4xI Wireline Grease Seal** protects against acids, caustics, salt water and H<sub>2</sub>S and other downhole chemicals.

All grades of **PLUSCO 422 4xI Wireline Grease Seal** are inhibited to provide protection against the corrosive effects of hydrogen sulfide up to 50,000 PPM or 5% concentration. For operations having higher concentrations of H<sub>2</sub>S special orders can be prepared upon request.

**PLUSCO Wireline Grease Seal** is available in six grades, which are most commonly used in areas with moderate climates. Upon request special low temperature grade material can be provided.

### **Specifications**

Color	Golden Yellow
Texture	Tacky Liquid
Odor	Mild
Density, lb/gal @ 77°F (25°C)	7.23
Specific Gravity, @ 77°F (25°C)	0.866
Flash Point, ASTM D-92	390°F (198°C)
Pour Point, ASTM D-97	0°F (-18°C)
Viscosity, Kinematic, cSt @ 40°C	9000 - 10000
Rust Test ASTM D-665B @ 140°F (60°C)	Pass
Operating Temperatures	18°C to +38°C 64°F to +100°F
Shelf Life (unopened container)	Two years
